

## Australian Tracking Champion Adorable Country Clover ET

16/7/1999 - 5/10/2011

We bought Clover for my Mum as a surprise 70th Birthday present.

And as her constant companion during her last years, Clover rarely left Mum's side. But without Mum she was lost for quite a while - not really sure just what her job was supposed to be now that Mum was gone. Finally she decided that she would look after Stella - and they became the best of buddies.

Clover lived another 5 years after mum was gone. Making the move with us to Tenterfield, and always greeting us each morning with that tail that never stopped wagging.

But then at a little more than 12 years of age, her eye sight failing and her body getting weary, it was time. And so we said our goodbyes to our little floppy-eared friend that we affectionately called "Shortie".

She was a good dog, she did a good job, and when the time came to say goodbye she went peacefully.

She won't be waiting at the gate for me . . . . .

I'm pretty sure Mum was at the gate when she got there.
