

Nutmeg Kisses

2004 ? - 10th July 2017

Over the years Stella & Clover had become inseparable and after losing Clover Stella was just devastated, she spent many days just sitting in the middle of the yard alone.

Several weeks passed with no change so I searched the rescue centres and finally heard about an older Cocker that was in the pound at Stanthorpe. She was matted and dirty but had obviously been in a good home originally as she was not de-sexed and had no signs of every having pups. She was not chipped, over weight, scared and had one day before she was to be put down.

It took a long time for Meg to trust us.

Eventually Stella & Meg became buddies, and although she didn't completely fill Clover's shoes . . . she certainly became an important part of Stella's life and our family.

We lost Stella In May 2016, and not wanting Meg to be alone we brought our oldest girl River (Heelersridge Riverina) up to the house. These two were not what you would call best mates - but they were great company for each other.

One year later we said goodbye to Meg who was approx. 12+ years old, nearly deaf and going blind. She had cancer in the bone on her front leg and we knew it was time.

Run free little dog, hope you find peace and if you see our Stella give her our love xxx
